**No: 75/Home/2016**

**Dated: 21/12/2016**

**NOTIFICATION**

Land Revenue and Disaster Management Department is preparing to conduct cadastral survey of all revenue land in the State. The survey shall be conducted as per the guidelines of Digital India Land Records Modernisation Programme (DILRMP). In order to carry out the survey it is necessary to install Ground Control Points in the form of RCC Pillars in different identified locations throughout the State in order to create survey grid. The Ground Control Points are permanent structures and have to be installed in safe and secure locations. Keeping this in view, the State Government has accorded approval to the Land Revenue and Disaster Management Department to install the Ground Control Points in all Government premises and properties wherever necessary without seeking further approvals.

Therefore, all State Government Departments are required to extend the requisite co-operation to facilitate the installation and maintenance of the Ground Control Points in their premises and properties.
